The International Union of Pure and Applied Chemistry (IUPAC), formed in 1919, is a voluntary, non-governmental, non-profit association of organizations, each of which represents the chemists of a member country.

Its objectives are:

to promote continuing co-operation among the chemists of the member countries;  
to study topics of international importance to pure and applied chemistry which need regulation, standardization, or codification;  
to co-operate with other international organizations which deal with topics of a chemical nature;  
to contribute to the advancement of pure and applied chemistry in all its aspects.

The membership of IUPAC presently comprises 42 countries, each represented by a national organization, such as an academy of science or research council.

### NATIONAL MEMBER ORGANIZATIONS

Academy of Scientific Research and Technology ( <b>Arab Republic of Egypt</b> )	Consiglio Nazionale delle Ricerche ( <b>Italy</b> )
Asociación Química Argentina ( <b>Argentina</b> )	Science Council of Japan ( <b>Japan</b> )
